	Tonnes	mm	mm	kg		ltr	
CAS450	6+	450	120	650	36	90-150	Tungsten Picks

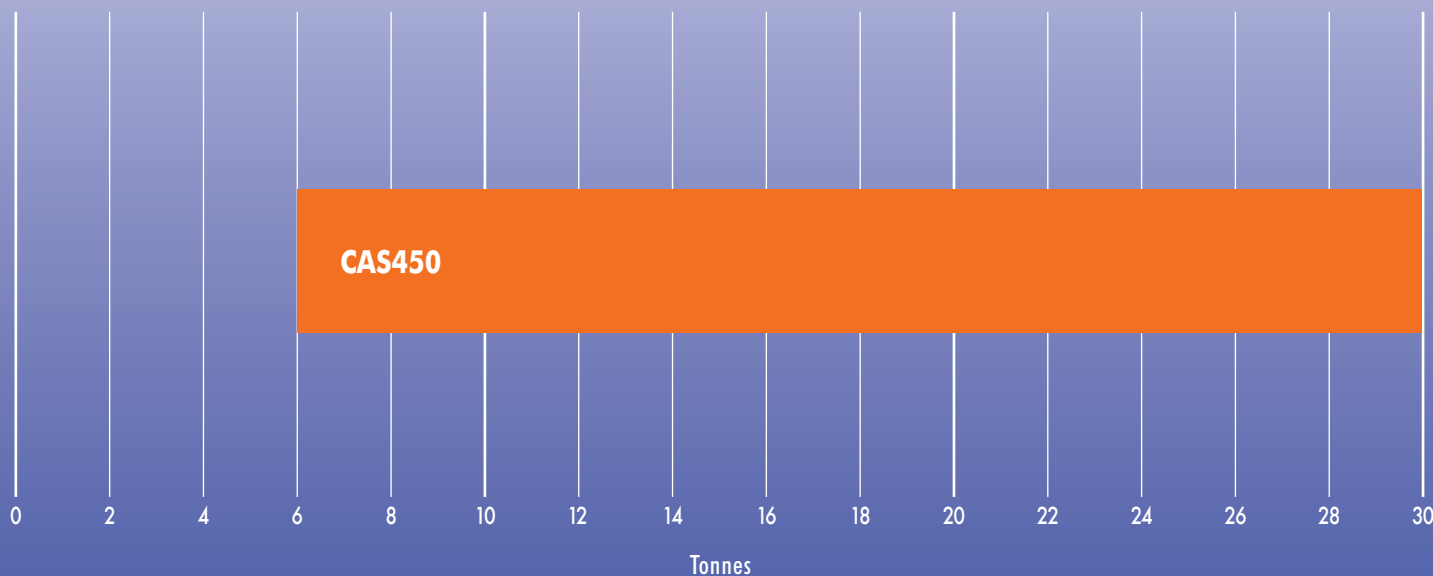

EFFICIENT, CONTROLLED SURFACE PLANING

Hire a heavy duty patch planer from Sandhurst for those awkward surface repairs to asphalt, or concrete surfaces. All are now easy and cost effective to complete.

Our patch planers fit all excavators over 6 tonnes. Because of the cassette style motor mounts, the cutting action of the planer is maintained accurately over the 450mm cutting width for precise control. It also makes accessing confined areas easier.

Sandhurst's versatile Planers are ideal when accurate removal of material is required by a milling action and are a good choice for large milling projects, asphalt overlay or parking bay repairs. Cutting occurs by the action of rotating tungsten picks and depth of cut is incrementally adjustable.

AT A GLANCE - THE RIGHT CASSETTE PATCH PLANER FOR YOUR CARRIER
